GitHub: github.com/ankitsharmx Mobile: +91-7091532582

Skills

- **Languages**: C, C++, Java, Python, SQL, JavaScript, HTML, CSS
- **Tools & Platforms**: GitHub, Google Firebase, Jupyter Notebook, Google Colab, Visual Studio Code, Tableau, Power BI, MS Excel
- **Data Science**: Pandas, NumPy, Scikit-learn, Seaborn, Data Cleaning, Feature Engineering
- **Soft Skills**: Problem-Solving, Teamwork, Adaptability, Time Management

Projects

Price Tracker and Data Automation [Link] In Progress

Tech Stack: BeautifulSoup/Selenium, Pandas, REST APIs, Scheduling (Cron), CSV/Database

- Built an automated system to track real-time price changes of 10,000+ Amazon products using Python-based web scraping and APIs.
- Designed scalable data pipelines to extract, clean, and store product data in structured formats (CSV/Database).
- Implemented price monitoring logic with alert mechanisms to identify significant price drops and deals.
- Optimized scraping performance and error handling, reducing failures by 30% and improving execution efficiency.
- Automated scheduling using cron jobs / task schedulers for continuous data updates without manual intervention.

Ai Interview [Link] May 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, Python

- Developed an AI-powered mock interview platform that simulates real interview scenarios using advanced NLP models, enabling users to practice and improve their responses.
- Integrated dynamic question generation and real-time response analysis to provide personalized feedback on communication, confidence, and technical accuracy.
- Built a full-stack web application using modern technologies, ensuring seamless user experience with responsive UI and efficient backend processing.
- Implemented performance tracking and analytics features to help users monitor progress and identify areas for improvement over multiple interview sessions.

Customer Churn Analysis [Link] In Progress

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

- Built a customer churn prediction model using machine learning algorithms to identify high-risk customers and improve retention strategies.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to uncover key factors influencing customer churn.
- Trained and evaluated models such as Logistic Regression, Decision Trees, and Random Forest, achieving improved prediction accuracy and model performance.
- Visualized insights using tools like Matplotlib/Seaborn to present actionable business recommendations for reducing churn.

Certification

- **Master Generative AI and Generative AI Tools (ChatGPT and More) – Udemy** [Certificate]: Aug 2025 – Oct 2025
- **Cloud Computing – NPTEL** [Certificate]: May 2025 – Oct 2025
- **Java Programming – IamNeo** [Certificate]: Jan 2025 – May 2025
- **Data Structures and Algorithms – IamNeo** [Certificate]: Aug 2024 – Jan 2025
- **Bits and Bytes of Computer Networking – Google** [Certificate]: Oct 2025

Extra-Curricular Activities

- **Volunteered with Kushwaha Seva Samaj NGO** : Nawada , Bihar May 2024 - July 2024
- **Participated in an HACK-IOT Hackathon.**: LPU , Punjab Mar 2024

Education

- **Lovely Professional University** Phagwara, India

B.Tech in Computer Science and Engineering; Current CGPA: 7.5 *Aug 2023 – Ongoing*

- **Guru Gobind Singh Public school** Bokaro, Jharkhand
  Higher Secondary Education; Percentage: 84.6 *Mar 2022*
- **St. Joseph School** Nawada, Bihar
  Higher Secondary Education; Percentage: 89.6 *Mar 2020*
